

Highlights of College of Engineering and Computer Science

The focus of the college is student success with hands-on learning, high impact experiences such as paid internships and research experiences backed by a strong learning system to ensure that students are ready for the workforce.

ACADEMIC PROGRAMS:

There are eight (8) Bachelor's programs and five (5) master's programs. All the MS programs are offered in an early entry format where a student in the Bachelor's program can take several senior year credits that can count towards both the undergraduate and graduate programs. So it is possible to finish BS+MS in five years. **The focus is on careers** and not on specific mathematical/coding skill set.

Bachelor's programs	Master's Programs
Civil Engineering (ABET Accredited) Electrical Engineering (ABET Accredited) Mechanical Engineering (ABET Accredited) Engineering Technology (ATMAE Accredited) Construction Management (F2F & online) Engineering Management Systems (F2F & online) Computer Science Data Science and Data Analytics	Computer Science Engineering Management (F2F & online) Civil Engineering Electrical Engineering Mechanical Engineering

STUDENT SUCCESS AND HIGH IMPACT EXPERIENCES:

1. **Focused learning groups are offered right from the freshman year for challenging courses.** These groups are led by junior/senior undergraduate students who have good communication skills.
2. **Industry tours are regularly offered** and industry experts visit the college to meet with students.
3. Participation of students in **student chapters of professional organizations are a top priority for the college**, and the students participate in lot of national level competitions.
4. **Undergraduate research** is a top priority of the college.
5. Plenty of **well-paid internships** are available.
6. **Class sizes are small**, and faculty are very approachable.
7. **Plenty of private scholarships.**

CAREERS:

1. Plenty of paid internships during your study.
2. Well-paid full-time positions (**almost 100% employment**) on graduation.
3. Most of the majors in our college **graduate with no or moderate debt.**
4. The **alumni base is well organized**, and are taking steps to mentor current students.
5. There are plenty of industry partners that support our students through scholarships, internships and jobs.
