Digitizing

Have some older media that you need to preserve on your hard drive? Do you have a video clip that you need to digitize for online viewing? Our Digitize service is here to help!

We understand that it is not always convenient to pull out the slide projector or drag the VCR caddy out of storage. Nevertheless, we don't want you to have to sacrifice this valuable information just because the media format is outdated. That's why we offer several options for converting older formats of media to new, easier-to-use versions. We can even store your videos on Kaltura, our Media Management System, so they can be easily embedded into your Canvas classes.

Below are just a few of the conversion services that we offer:

- VHS to DVD or storage on Kaltura.
- Vinyl Records and cassette tapes to CD, MP3 format, or storage on Kaltura.
- CDs for storage on Kaltura.
- DVDs for storage on Kaltura.
- Carousel projector slides and photographs into a digital format.
- We can also help and/ or teach you to edit and convert your videotaped lectures to DVD, or you can store them on Kaltura for use in Canvas or the public domain. (For security reasons, you must specify that you would like to use the media in the public domain.)
- We can also help you with PowerPoint Presentations.
- We can even show you how to narrate them if you would like.

Fill out **our form** to submit your request, and then drop your media off at our office for processing.
