

Honorlock Exam Proctoring - Introduction

Honorlock is an online proctoring tool that allows students to complete secure exams on-demand under proctor guidance without the need to schedule them. They use a combination of artificial intelligence technology, website/multi-tab blocking BrowserGuard, and live proctoring to safeguard academic integrity. AI monitors test sessions for suspicious activity and notifies the proctor about any problematic or unsanctioned behavior. The proctor reviews flagged behavior in real time and may "pop-in" to speak to students directly.

Please see the short video below to learn how Honorlock works in more detail.
