

Registration Status

Registration Status and Academic Advisor Information

1. Go to **Registration Status** on the registration menu.
2. Select a term and select **Continue**.

The Registration Status page identifies problems that may affect registration for the selected term, including holds, academic standing, and student status.

It also identifies any permits you have been granted, your earned hours, and curriculum information.

You should check your registration status before registration each term to make sure you can register on time.

Viewing Holds

If you have holds on your account you won't be able to register until they're taken care of and your Registration Status shows no holds which prevent registration. **To handle a hold, contact the Originator at the phone number listed under the hold.**

In addition to being listed under Registration Status, holds can also be viewed on the top right of the Self Service home page.

1. Select **Holds** to view a list of holds on your account.
2. Use the arrow icon to display more information about a hold.

You cannot register if **Registration** is listed as an affected process.

Locating Your Academic Advisor

Your academic advisor is listed on the Self Service home page.

1. Locate the gray area beginning with **Bio Information**.
2. Your advisor is listed at the bottom of this area under **Advisors**.

Select an advisor's name to view their email address.

If you aren't cleared by your advisor you will receive the message "**Time tickets prevent registration at this time**" when attempting to register for classes. You cannot register for classes until cleared by your advisor.

Revision #6
