

How do I add a module?

Modules are used to organize course content by weeks, units, or whatever organizational structure works for your course. With modules, you are essentially creating a one-directional linear flow of what you would like your students to do. Once you create modules, you can [add content items](#), [assign the module](#), or [add requirements](#).

[Learn more about Modules.](#)

Note: If the Course Home Page is set to modules, modules can be added and managed directly from the Course Home Page.

Open Modules

Open Modules

In Course Navigation, click the **Modules** link.

Add Module

Add Module

Click the **Add Module** button.

Add Module Name

Add Module Name

Type a name in the **Module Name** field.

Lock Module Date

Lock Module Date

If you want to restrict the module until a specific date, you can [lock the module](#).

Add Module Prerequisites

Add Module Prerequisites

If you have added at least one module to your course, you can require a [prerequisite module](#). A prerequisite module means students must complete the added modules before they can view the new module.

Add Module

Add Module

Click the **Add Module** button.

View Module

[View Module](#)

View your created module.

To add items to your module, click the **Add** icon [1] or drag and drop to add files to an empty module [2].

You can also [edit the module](#), [assign](#) it, [move](#) it, [duplicate](#) it, [delete](#) it, [send](#) it to another instructor, or [copy](#) it to another course.
