How do I apply Submission Stickers in Gradebook?

The Submission Stickers feature option allows instructors to add stickers to individual and group assignment submissions per attempt, offering an engaging way to provide feedback.

Once enabled at the account or course level, instructors can apply stickers through the Traditional Gradebook tray, Individual Gradebook, and SpeedGrader.

Stickers are also supported for anonymous assignments, ensuring privacy. For moderated assignments, stickers can be added once they are published. Stickers follow post policies, meaning grades must be posted for students to view them.

Notes:

- Submission Stickers only work in courses that have also enabled the Assignment Enhancements feature option.
- By default, the Submission Stickers feature option is disabled.
