# How do I create a True or False question in New Quizzes?

When creating a quiz, you can create a True or False question in New Quizzes.

You can also duplicate True or False questions to create a new question.

## Add Question

Add Question
To create a question, click the **Add** button anywhere in the quiz.

## Add True or False Question

Add True or False Question
Click the **Add True or False** button.

## Add Question Title and Stem

Add Question Title and Stem
In the **Question Title** field [1], add a question title. Question titles are optional and are not visible to students.

In the **Question Stem** field [2], add the question stem. The question stem contains the question and, if necessary, additional instructions and information. You can use the Rich Content Editor to format and add content to your question stem.

## Select Correct Answer

Select Correct Answer
To select the correct answer for the question, click the button next to the **True** [1] or **False** [2] option.

# Enable On-Screen Calculator

Enable On-Screen Calculator
To allow students to use an on-screen calculator for this question, click the **Show on-screen calculator** checkbox [1].

If you select this option, you can choose either a basic calculator [2] or scientific calculator [3]. The basic calculator displays numbers and basic math functions (add, subtract, multiply, divide). The scientific calculator displays more options for advanced calculations.

**Note:** The on-screen calculator option is intended to be used while displaying one question at a time. If the quiz does not display one question at a time, students may be able to use the calculator for all questions.

# Align to Outcome

Align to Outcome

To align the question to an outcome, click anywhere in the **Align to Outcomes** section.

# Add to Item Bank

Add to Item Bank

To add the question to an item bank, click the **Add to Bank** link.

**Note:** After a question has been added to an item bank, it can only be edited in the item bank. You can still set unique point values and options in the quiz for an item bank question.

# Add Point Value and Feedback

Add Point Value and Feedback
To customize the point value for the question, type the point value in the **Points** field [1] or use the arrows to increase or decrease the point value [2].

To leave feedback for students, click the **Feedback** icon [3].

# Save Question

Save Question
To save the question, click the **Done** button.
