

How do I edit or delete a module?

You can edit a module in the Edit Module Settings menu. Editing a module allows you to rename the module, [lock modules](#), [add prerequisites](#), [add requirements](#), or edit the module assignment details.

If necessary, you can delete a module in your course. When you delete a module, all of the items in that module are removed, but they are not deleted from the course.

Open Modules

Open Modules

In Course Navigation, click the **Modules** link.

Open Assign To

[Edit Module](#)

Locate the name of the module and click the **Options** icon [1]. Select the **Edit** link [2].

Edit Module Settings

Edit Module Settings

In the **Settings** tab, edit the module settings you want to change. You can rename the module [1], [lock the module](#) [2], [add prerequisites](#) [3], or [add requirements](#) [4].

Edit Module Assignment Details

Edit Module Assignees

To edit module assignment details, click the **Assign To** tab. You can [assign a module to everyone, individual students, or sections](#).

Update Module

Update Module

When you are ready to save your Module changes, click the **Save** button.

Re-Lock Module

Re-Lock Module

If you change any module requirements or prerequisites that students have already fulfilled, a message asks if you want to let students progress through the course or re-lock the modules and require students to complete the requirements again.

To re-lock the modules, click the **Re-Lock Modules** button [1]. To allow students to continue without any changes, click the **Continue** button [2].

Delete Module

Delete Module

To delete a module from the Modules index page, click the **Options** icon [1]. Then click the **Delete** link [2].

Confirm Deletion

Confirm Deletion

Click the **OK** button.
