

How do I embed a video in a page in a course?

Canvas lets you embed video content within a page.

Notes:

- Canvas only supports secure video URLs (HTTPS) for embedding.
- Video playback defaults to the lowest resolution quality. Users can manage video playback options in the video settings menu.

Open Pages

Open Pages

In Course Navigation, click the **Pages** link.

View Pages

[View Pages](#)

Pages is designed to open to the front page for the course, if there is a front page selected. To select a page from the Pages Index, click the **View All Pages** button.

Open Page

[Open Page](#)

Click the title of the page you want to view.

Edit Page

Edit Page

Click the **Edit** button.

Open Insert Media Tool

Open Insert Media Tool

Click the **Media** icon. You can upload and embed media files from [your computer](#) or [from Canvas](#).

Notes:

- Media will be inserted at the location of your cursor in the Rich Content Editor.
- You can also upload and embed media files from [external sources](#) or [YouTube](#).

Save Page

Save Page

Click the **Save** button.

View Page

View Page

View the video embedded into your page.
