

How do I enable SpeedGrader to launch filtered by student group?

In large courses with many student groups, instructors may wish to filter SpeedGrader by student groups. When the Launch SpeedGrader Filter by Student Group setting is enabled, you must select a student group when you [open SpeedGrader to grade an assignment, quiz, or graded discussion](#) or [from the Gradebook](#). Only students from the selected group will display in SpeedGrader.

When this option is enabled, certain areas that open SpeedGrader will prompt you to select a student group to view in SpeedGrader. In areas that do not provide this option, SpeedGrader will open filtered to the first group that contains students. You can change the student group that opens by first [selecting a student group in the New Gradebook](#). However, if you open SpeedGrader for a specific student, SpeedGrader will open filtered by the first available student group in which the student is a member. Additionally, if you open SpeedGrader from a specific student who is not a member of a student group, group filters will not be applied.

Open Settings

Open Settings

In Course Navigation, click the **Settings** link.

Open Course Details

Open Course Details

Click the **Course Details** tab.

Set SpeedGrader Filter Option

Set SpeedGrader Filter Option

Click the **Launch SpeedGrader Filtered by Student Group** checkbox. When this setting is enabled, you must select a student group before opening SpeedGrader.
