How do I hide grade distribution scoring details from students?

Instructors can hide the box and whisker plot (grade distribution) graphs to keep students from viewing the summary statistics of the class and figuring out each others' grades. By default, the whisker graph is on. When the grade distribution graph is hidden, students cannot view any aspect of the graph, including the high, low, and mean scores.

Note: The grade distribution graph displays for students after five or more students submit the assignment and remains visible for instructors after hiding the graph from students.

Open Settings

Open Settings
In Course Navigation, click the **Settings** link.

Open Course Details

Open Course Details
Click the **Course Details** tab.

Hide Grade Distribution

Hide Grade Distribution
Check the **Hide grade distribution graphs from students** checkbox.

Update Course Details

Update Course Details
Click the **Update Course Details** button.

Student View

Student View

When the grade distribution graph is hidden, students can view their score, but cannot view any other aspect of the graph, including the high, low, and mean scores.
