

How do I remove module items?

You can remove individual content items from your [modules](#).

Removing a item will only remove it from the selected module. If you have included the item in other modules, they will not be affected.

Open Modules

Open Modules

In Course Navigation, click the **Modules** link.

Remove Module Item

[Remove Module Item](#)

Click the **Options** icon [1] and select the **Remove** link [2].

Confirm Removal

Confirm Removal

Click the **OK** button.
