

How do I use course settings?

Course Settings is where you can easily update and view course details, sections, navigation link options, external app configurations, feature options, and integrations.

Depending on your [permissions](#), you can edit differing levels of the course settings.

Open Settings

Open Settings

The settings portion of your course is only available to instructors.

In Course Navigation, click the **Settings** link.

View Course Details

View Course Details

In the [Course Details](#) tab [1], you can view the details of your course including its name, course code, file storage availability, and other course options.

You can also view the course status [2].

Note: To know whether a published course can be unpublished, hover the cursor over the course status. If the course cannot be unpublished, the hover text notifies you accordingly.

View Sections

View Sections

In the Sections tab, you can [add a section](#) to your course and manage student section enrollments.

View Navigation

View Navigation

In the Navigation tab, you can modify the Content Navigation links listed in your course. You can drag and drop to [reorder and hide course navigation links](#).

Any configured course navigation External Apps (LTI Tools) that appear in Course Navigation appear here as well.

View Apps

View Apps

If your institution has enabled the [Canvas App Center](#), in the Apps tab you can view all available external learning tools in Canvas. However, you can also configure apps manually.

View Feature Options

View Feature Options

In the [Feature Options](#) tab, you can enable and disable Canvas features within your course as made available by your account admin.

View Integrations

View Integrations

If enabled by your institution, you may also view the Integrations tab. From the Integrations tab, you can [sync enrollment data to Microsoft Teams](#).
