

How do I use the Canvas App Center in a course?

The App Center is your gateway to powerful teaching tools that are easily integrated into a Canvas Course.

Open Settings

Open Settings

In Course Navigation, click the **Settings** link.

Open Apps

Open Apps

Click the **Apps** tab.

View App Center

View App Center

The App Center shows all apps available in your course [1]. You can also filter by installed [2] and not installed [3], or use the search field to locate a specific app [4].

View App

View App

To view a quick description of an app, hover over the app. To view all details, click the app.

View App Details

[View App Details](#)

On the details page, you can view a description of the app [1]. When you are ready to install the app with the proper credentials, you can add the app as a tool for your course [2].

Note: The Canvas App Center does not always contain all the information about an app. You may want to visit the [Edu App Center](#) for complete information about the external app you want to configure.

View App Configurations

View App Configurations

To view existing apps and configurations in your course, click the **View App Configurations** button.

View Account-Level Apps

View Account-Level Apps

You can view all configured apps in your course.

Apps that have been configured by your Canvas admin at the account level display a **Lock** icon [1]. You can view the placement of the app by clicking the **Information** icon [2]. The placement shows the location(s) of the app, such as Course Navigation or the Rich Content Editor, so you know where it appears in your course.

Manage Course-Level Apps

Manage Course-Level Apps

To view configurations for a course-level external app, click the app's **Settings** icon [1]. To edit the app, click the **Edit** link [2]. To view placements for the app, click the **Placements** link [3]. To Delete the app, click the **Delete** link [4].

View App Placements

View App Placements

App Placements shows the places in Canvas where your app can be used.

Note: You may see a No Placements Enabled message. This message indicates that the app does not have any specified placements within Canvas. However, the app will still work as intended.
