

College of Education and Behavioral Science Procedural Manual

This handbook is an organized effort to gather in one place the basic information needed to operate the College of Education and Behavioral Science. In this regard, the policies and procedures governing the operations of the College are both those which govern its operation within the university and those which speak specifically to it. To avoid redundancy and duplication of policies elsewhere in the university community, this manual includes only those policies and procedures specifically related to the operation of the College of Education and Behavioral Science.
