Data For Faculty Research

The Office of Institutional Research supports the research enterprise at A-State. Many grant proposals require institutional data on demographics of student or faculty populations. In the banner to the left are Quick Stats, one page documents summarizing enrollment numbers for 5 years for 1) all students, 2) first-time freshmen, and 3) Science, Technology, Engineering, and Mathematics (STEM) students. These Quick Stats reports provide numbers of students by level, student load, age, gender, ethnicity, college, origin, degrees awarded and income category. Additional and customizable information can be found at the Tableau Interactive Dashboard (link in banner to the left) for faculty and students. If you have any questions about the data, please email the Office of Institutional Research at asuirp@astate.edu; if you need assistance with your grant proposal, please reach out to Research and Technology Transfer at research@astate.edu or 870-972-2694.
