

Overview of Kaltura at A-State

Kaltura is Arkansas State University's enterprise video platform for creating, storing, sharing, and analyzing instructional media. It supports faculty and students across multiple learning environments, including Canvas, MediaSpace, and classroom recordings.

What Is Kaltura?

Kaltura is a cloud-based video management system that allows:

- Secure hosting of instructional videos
- Easy embedding in Canvas courses
- Auto-captioning and accessibility features
- Video quizzes with gradebook integration
- Analytics to track student engagement

It is integrated with Canvas and available to all A-State faculty, staff, and students.

Where to Access Kaltura

- **Kaltura MediaSpace:** <https://astate.mediaspace.kaltura.com>
Use your A-State credentials to log in and manage your media library.
 - **Canvas Integration:**
 - Access via **My Media** in the global navigation menu
 - Use **Media Gallery** in individual courses
 - Embed videos using the **Browse & Embed** tool in the Rich Content Editor
-

How to Use Kaltura

Kaltura supports a variety of workflows for adding and using video content:

Ways to Add Video

- **Media Upload**
Upload recordings made with other tools such as:
 - [CETL Studio](#)
 - Microsoft Teams (via OneDrive)
 - Zoom (manual upload)

- Other tools listed in the [Teaching & Learning Software Index](#)

- **Express Capture**

Record directly from your webcam in the browser—no software installation required.

- **YouTube Integration**

Add YouTube videos to your Kaltura library to:

- Replace YouTube links in Canvas
- Track analytics
- Include in galleries or quizzes

- **Kaltura Capture**

A desktop recorder for creating screen captures, webcam recordings, or both. Ideal for asynchronous lectures and tutorials.

“ All uploaded or recorded videos appear in your My Media library.

Ways to Use Video

Once in **My Media**, videos can be:

- Embedded in Canvas or other websites
- Published to a course Media Gallery
- Turned into **Video Quizzes** with gradebook integration
- Enhanced with **Interactive Video** features
- Tracked using **Analytics** to monitor student engagement

How Kaltura Fits into A-State's Media Ecosystem

Tool	Purpose	Integration
Canvas	Embedding, quizzes, analytics	Full integration
MediaSpace	Personal media management	Standalone portal
CETL Studio	High-quality faculty recordings	Upload to Kaltura
Microsoft Teams	Meeting recordings	Manual upload from OneDrive

“ **Notes:**

- Faculty who continue using **Zoom** after the campus license ends will need to **manually upload** their cloud recordings to Kaltura via MediaSpace or My Media in Canvas.

- **Microsoft Teams** recordings are saved to **OneDrive** and must also be **manually uploaded** to Kaltura.
