Technology Purchasing Processes

All technology purchases must be accessible to the visually impaired. This includes new technology purchases and software renewals.

A VPAT (Voluntary Product Accessibility Template) on most purchases will be required to verify the purchase is compliant with Arkansas law.

***The department is not required to obtain a VPAT from a state/cooperative contract items (ex. Dell).

Software cannot be purchased via the P-Card unless approved in advance to verify that it meets the requirements.

Software Purchases:

- **Technology & Digital Service Purchase Pre-Authorization:** Before purchasing software, departments must submit the Technology & Digital Service Purchase Pre-Authorization form form along with the required documentation.
- **Security Review Process:** The IT Security team will review the submitted software documentation to ensure compliance with university and industry security requirements. The team will also work with the necessary users/departments to address any concerns with the vendor, if applicable.
- **Security Approval:** Once the software is approved by IT Security, the department will be notified and can proceed with the requisition process as per standard operating procedures. Procurement will also be notified of the security approval.
- **Existing Procurement Processes:** Please note that all current procurement processes remain in effect, including those for any purchases or contracts exceeding $20,000. Departments should contact Procurement at procurement@AState.edu for further guidance on these purchases.

Audio/Visual Equipment, Cisco Desktop Phone, Digital Signage, and TV Purchases: Contact ITS at 972-3033.

Cell Phone, MIFI and Data Plans (for iPads) - Contact ITS at 972-3033. You may also go to the Network & Wireless section of the Help Desk ticketing application.

On-Campus Purchasing from ITS
Vendor ID: 50554137

1. Obtain a quote from Information and Technology Services.

2. Initiate an online requisition to ASU Information and Technology Services.
3. Override the default Commodity Code description with the specific description and item number of the product being ordered.
4. Any additional information for line items should be entered in Item Text.
5. Enter quantity and amount.
6. Use Tax Group 'P' for services or 'U' for purchases.
7. Procurement will process the requisition and complete a purchase order
8. Procurement writes the PO number on the requisition, and then forwards the requisition and back-up documents to Accounts Payable for payment.

For more information, see the Information and Technology Services web site
