

Job Search

The Office of Career Development & Engagement connects students, alumni, and employers. Whether you're exploring majors, looking for a job, or recruiting top talent, they're available to help.

It is suggested that you include recommendations from a major instructor and your Experienced Mentor Teacher(s). Requesting recommendations should be done before you graduate, as people sometimes relocate or retire, making it difficult to obtain them later. It is also suggested that you keep your file up to date by periodically adding recommendations from your employer.
