Slate - Monthly Training

Description

We hold a virtual 1 hour training session each month that covers Slate basics, new features, and open discussion. Topics covered include; general overview of Slate navigation, NOA processing, Communications, Queries, Advising Appointment management, and new features recently added.

The sessions typically have a 30 minute crash course in Slate followed by 30 minutes of open discussion covering use cases, errors/issues, inefficiencies, or anything else Slate related.

Schedule (All sessions start at 2 p.m. CT)

November 19th
